*1: Annualized premium is the amount of money equivalent to what is to be paid to have the insurance coverage for one year. All payments for Lifenet products are in monthly installments, we calculate annualized premium as multiplying the monthly premium (for GCL, expected premium income for the next month based on the in-force business) by 12 months.
*2: This report is preliminary and may be different from the final settlement report. Annualized premium of GCL is based on data available as of aggregation. Figures of GCL for THE KYOTO SHINKIN BANK (launched July 2026) are excluded from these preliminary results and will be included starting next month.
*3: The surrender and lapse ratio is the annual equivalent of the monthly number of policies surrendered and/or lapsed divided by the monthly average number of policies-in-force.
