Proposal 1: Regarding the Election of Eight (8) Directors

The tenures of all ten of the current directors will expire upon conclusion of the Annual General Meeting of Shareholders. The candidates for election as directors were nominated by the discretionary Nomination and Compensation Committee, which consists of the independent outside directors and the representative director.

The candidates for Director positions are as follows:

Proposal 4: Decision on Compensation of Directors (excluding Outside Directors) Through the Granting of Restricted Stock

The total amount of director compensation was approved at 180 million yen a year (not including employee wages when a director serves concurrently as an employee) at the 12th Annual General Meeting of Shareholders held on June 24, 2018.

As part of a recent review of the officer compensation system, Lifenet decided to also compensate directors by granting restricted stock, within the scope of the compensation amount noted above. The purpose of this is to give directors (excluding Outside Directors, hereafter “eligible directors”) the incentive to work for continual enhancement of the corporate value of the Company and to promote greater shared value with shareholders. However, the amount of compensation noted above does not include the employee salary portion of directors who serve concurrently as employees.

Based on this proposal, eligible directors shall receive compensation to pay for the restricted stock granted in the form of monetary claims (hereafter “monetary compensation claims”). The Board of Directors, following deliberation at the discretionary Nomination & Compensation Committee shall determine the specific timing and allocation of restricted stocks to each eligible director. However, compensation for restricted stock grants will not be paid to outside directors.

There are currently ten directors (four of whom are Outside Directors). However, if the original resolution in Proposal 1 (Regarding the Election of Eight Directors) is approved, there will be eight directors (four of whom will be Outside Directors), four of whom will be eligible.

Eligible directors shall pay in the entire amount of monetary compensation claims paid to them under this proposal as a cash investment asset, and will receive ordinary shares issued or distributed by the Company. The total number of shares issued or distributed under this system shall be 200,000 shares a year or less (however, the total number of restricted shares issued or distributed may be adjusted within a reasonable scope when the need for adjustment arises on or after the date on which this proposal is approved, due to a share-split of the Company’s ordinary shares—including gratis issues of Company ordinary shares—or a reverse stock split.)

The Board of Directors will determine the amount to be paid in per share. This amount will be based on the closing price of the Company’s ordinary shares on the Tokyo Stock Exchange on the business day immediately preceding the date of the each Board of Directors resolution (the closing price on the most recent day on which trading has taken place if there is no trading on that day), and will be an amount that does not provide the eligible directors who receive the ordinary shares with a particularly advantageous price. When issuing or distributing ordinary shares of the Company through this system, the Company will enter into a restricted transfer stock allocation agreement (hereafter “allocation agreement”) with eligible directors that contains the following provisions.

The content of this proposal is based on the proposal of the discretionary Nomination & Compensation Committee, which consists of independent directors and the representative director.

(1) Transfer Restriction Period

Eligible directors must not transfer, pledge as collateral, or otherwise dispose of (hereafter “transfer restrictions”) the ordinary shares allocated under the allocation

agreement (hereafter “allocated shares”) for the period determined in advance by the Board of Directors (hereafter “transfer restriction period”), which shall be between three years to five years from the date on which the allocation under the allocation agreement was received.

(2) Release of Restriction on Transfer

The Company will release the restriction on transfer once the transfer restriction period on the allocated shares has expired, on the condition that the eligible director has continued to serve as a director for the duration of the transfer restriction period. However, if the eligible director has resigned or left the position specified above before the expiration of the transfer restriction period owing to reasons approved in advance by the Board of Directors, the number of allocated shares released from transfer restrictions and the timing of the release from transfer restrictions may be adjusted within reason. In accordance with the above rules, the Company will also naturally acquire the allocated shares on which the transfer restrictions have not been released for free, immediately after the transfer restrictions are released.

(3) Handling in the Event of Organizational Restructuring

In the event that a merger agreement that renders the Company a defunct company, a share exchange agreement making the company a wholly owned subsidiary, a share transfer plan, or other organizational restructuring approved at the Annual General Meeting of Shareholders (however, this shall be the Board of Directors for such organizational restructuring or other events that do not require the approval of the Annual General Meeting of Shareholders) occurs during the transfer restriction period, the restrictions on transfer may be released on a reasonably prorated number of shares allocated in advance, based on the time period from the date on which the transfer restriction period began to the date on which the organizational restructuring or other event occurred, when approved by the Board of Directors of the Company, the provisions stated above in (1) notwithstanding. When the above rules are applied, the Company will naturally acquire the allocated shares on which the transfer restrictions have not been released for free, immediately after the transfer restrictions have been released.

(4) Other Matters

Other matters concerning the allocation agreement shall be decided by the Board of Directors of the Company following deliberation at the discretionary Nomination & Compensation Committee.

[Diagram of New Compensation System]

* The introduction of this restricted stock compensation system will not increase the amount of total director compensation. The Company Board of Directors will determine the ratio of base compensation (fixed salary) to stock compensation of the eligible directors and will be deliberated at the discretionary Nomination & Compensation Committee; however, it shall be generally based on a ratio of 7:3.

Other accomplishments

This fiscal year, we launched an updated version of *Kazoku* term life insurance in April 2018. In addition to lowering the premium, we also expanded the coverage options, thereby enabling a broader range of customers to apply. We also released *au Cancer Insurance* into our lineup of our *au Life Insurance* white label products sold through KDDI Corporation, a sales agent, in April 2018.

In terms of services for our policyholders, we expanded our *Survivorship Support Services*, which we began with the launch of our cancer insurance in August 2017. Our *Survivorship Support Services* is a selection of services offered by our partnering companies to cancer patients to assist with their daily lives. This fiscal year we added new services in the following areas to the line-up: online cancer and reproductive treatment counseling, clothing and undergarments, and nutritional supplements.

We have also expanded the services available via smartphone. *Visual IVR*, launched in February 2019, is a service that sends a visual menu to the smartphones of customers who

make inquiries to the contact center. The menu includes FAQs (frequently asked questions) and various procedures for policyholders, enabling customers to find solutions to their questions even outside of contact center business hours. LINE Inquiry or Callback Request functions are available for customers who want more detailed information.

Our products were rated highly by many third-parties this past fiscal year. *Hataraku-Hito* 2 long-term disability insurance was rated the No. 1 choice by insurance specialists in four types of media, including the 2019 Oricon Client Satisfaction Survey^{*1}. Our cancer insurance product received the Nikkei TRENDY Grand Prize in the Nikkei TRENDY^{*2} magazine cancer division. 2 Challenges

Mid- to long-term business strategy and challenges

We formulated a new management policy in November 2018 aimed at the continued steady growth and achievement of high profitability over the mid- to long-term. The policy is summarized below:

Summary of New Management Policy

Mission	Help our customers embrace life more fully by offering comprehensible, cost-competitive and convenient products and services
Vision	Be the leading company driving the growth of the online life insurance market
Priority areas	<ul style="list-style-type: none"> ● <u>Innovation of customer experience</u> Enhancing and evolving the quality of all services with digital technology ● <u>Enhancement of promotion capabilities</u> Generating massive customer traffic by active promotion and expansion of agent sales and white label business
Management goal	Aim to achieve EEV (indicator of corporate value) of 100 billion yen by business growth in a mid-term

Research by the Japan Institute of Life Insurance released in September 2018 indicated that roughly 12% of potential subscribers of life insurance intended to apply for a policy through the Internet in the future, although only around 3% of life insurance subscribers actually did so. Meanwhile, the share of direct automobile insurance has steadily grown, reached approximately 8%^{*1}. We are certain there is potential for growth in the online life insurance market in light of these circumstances; however, insurance providers, including Lifenet, are not yet capable of fully catering to customer needs at this stage.

Considering the above, we continue to pursue our mission, “helping our customers embrace life more fully by offering comprehensible, cost-competitive and convenient products and services,” and strive to achieve our vision of being the leading company driving the growth of the online life insurance market.

We have also designated EEV as the key indicator of corporate value and strive to achieve 100 billion yen as early as possible.

Please note that from fiscal 2019 onward we will target further growth in line with the management policy announced in November 2018. We believe that responding flexibly to the rapidly changing Internet and its surrounding environment is important in order to achieve sustained growth and higher earning power over the mid- to long-term. We will therefore aim to increase corporate value by making optimal management decisions according to changes in the environment, based on our new management policy, rather than on a plan with a predetermined timeframe.

We will undertake initiatives addressing the following important challenges and target further enhancement of corporate value in the mid- to long-term.

(1) Further growth in business performance

We will aim for growth in business performance through two priority areas stated in the new management policy: “Innovation of customer experience” and “Enhancement of promotion capabilities.”

We recognize that providing our customers with quality experience is essential for them to continuously choose Lifenet and is a critical element in achieving increased growth. To achieve this, we will endeavor to provide customers with not only products and services, but also to innovate the customer experience by providing more user-friendly processes and administrative procedures. Increasing customer satisfaction and strengthening our relationship with customers by improving each encounter our customers have with us is also essential, and thus we will optimize the data we have gathered through our customers’ actions to improving our website. We will simultaneously work to create a convenient life insurance, which we believe to be fundamental in meeting customer expectations. We will also strive to communicate with our approximately 200,000 existing policyholders, gaining further trust and loyalty.

In addition, we will strengthen our sales capabilities and strive to generate massive customer traffic. To expand our internet channel, we will continuously air television commercials and engage in other advertising and promotional efforts to further strengthen our brand, and in doing so, increase recognition of Lifenet among potential customers.

We will also strengthen agent channels and white label sales in order to provide the products and services of Lifenet to an even greater number of customers. Collaboration with existing and new corporate partners, such as KDDI CORPORATION whose customer base we use to provide *au life insurance*, is an area we will continue to focus on.

(2) Improvement of operating expenses efficiency

Lifenet will utilize the fact that the life insurance industry is a business with dependable recurring earnings to expand the scale of our business and enable Lifenet to benefit maximally from the merits of scale. We also strive to improve business efficiency by pursuing initiatives aimed at improving productivity company-wide. The use of technology, such as partially automating operations, will aid these efforts. We will continue to invest in operating expenses as we continue to target growth in new business performance in fiscal 2019, focusing on operating expense efficiency, and will always work to maximize the benefits derived from investing in marketing by gathering, managing, and analyzing data on the cost versus the benefits.

We will target further growth by pursuing the initiatives described above while working to enhance management resources.

3 Others

Dividend policy

Lifenet has yet to determine its specific dividend policies and dates for the start of distributing retained earnings as dividends as we still record cumulative loss and will be prioritizing strengthening our growth base to increase mid to long term profitability. Lifenet will consider paying dividends in the future.

Lifenet's Articles of Incorporation stipulates that a decision on the distribution of retained earnings as specified in each Item of Paragraph 1, Article 459 of the Companies Act can be made by a resolution of the Board of Directors, except as otherwise determined by law.
